Mock questions, rationales & case studies
-  **Designed for International Nurses**
For BN/Midwifery graduates from Sri Lanka
-  **NOCN UK Endorsed**
Approved accredited centre, Programme 30013567

“A structured, internationally aligned NCLEX preparation pathway for nurses and midwives seeking global career opportunities.”

Delivery: Online LMS + Virtual Tutorials

Duration: 4–8 Months Self-Paced

Target Group: BN / Midwifery Graduates

Exam Venue: Pearson VUE, Kuala Lumpur

What the Programme Includes

A blended learning model built for internationally qualified nurses

1 Self-Paced Online Learning

Candidates progress through the EDUK8U Learning Management System (LMS) at a pace that suits their schedule. Structured micro-learning modules break complex clinical content into manageable topics, supported by summative topic videos and interactive e-learning subjects. All content is accessible online, designed to fit around existing work or family commitments over a 4–8 month preparation period.

2 Virtual Instructor-Led Tutorials

Scheduled virtual sessions connect candidates with experienced facilitators for live guidance, group question-and-answer sessions, and clinical reasoning discussions. These tutorials reinforce key examination concepts, provide structured feedback, and allow candidates to address challenging topics in a collaborative environment. Group workshops on clinical judgement and exam strategy are included throughout the programme.

3 NCLEX-Style Practice and Mock Tests

The programme includes multiple-choice questions after every topic through the LMS or Google Forms, alongside topic-level mock tests and full NCLEX-style practice questions. Next Generation NCLEX (NGN) item types are integrated throughout, including unfolding case studies and scored branching simulations. All mock questions are supported by detailed rationales to strengthen understanding and exam reasoning skills.

4 Clinical Judgement and Exam Readiness

The programme moves beyond knowledge recall to build genuine clinical judgement. Content covers patient prioritisation, medication safety, delegation, critical decision-making, and the NCLEX Clinical Judgement Measurement Model (CJMM). Candidates develop the ability to analyse, apply, and evaluate clinical information — the skills that matter most in both the NCLEX examination and professional nursing practice.

What You Will **Build**

- NCLEX examination confidence
- NGN question format familiarity
- Prioritisation and delegation skills
- Clinical reasoning skills
- Medication and patient safety awareness
- International nursing readiness

Key Topics Covered

Structured across four learning domains — from exam readiness to professional practice

NCLEX and NGN Exam Readiness

- › Next Generation NCLEX (NGN) overview
- › NCLEX question types and formats
- › Clinical Judgement Measurement Model
- › NCLEX prioritisation rules
- › Safe nursing practice statements
- › Test-taking strategies
- › Scored branching simulations
- › Unfolding case studies
- › Mock questions and rationales

Core Clinical Knowledge

- › Arterial blood gas (ABG) interpretation
- › Electrolyte disorders
- › Diabetes management
- › Heart failure medications
- › Cardiac and respiratory systems
- › Endocrine and neurological systems
- › Gastrointestinal system
- › Musculoskeletal system
- › Pharmacology and medication safety

Specialised Nursing Areas

- › Maternity and neonatology
- › Psychiatry and mental health nursing
- › Alcohol and drug abuse (ATOD)
- › Infection prevention and precautions
- › Foundational nursing skills
- › Paediatric nursing concepts
- › Oncology nursing awareness
- › Critical care and ICU principles

Professional Practice

- › Staff management in nursing
- › Delegation and scope of practice
- › Patient safety and error prevention
- › Cultural safety awareness
- › Australian nursing standards (NMBA)
- › NMBA RN Standards for Practice
- › Aboriginal and Torres Strait Islander health context
- › Ethical and legal principles

Programme Design Approach: *The NCLEX Preparatory Course is structured to move candidates from knowledge recall toward application, analysis, clinical judgement, and genuine exam readiness. Content is sequenced to build confidence progressively — from foundational nursing principles through to complex clinical reasoning and NGN-style examination skills. All topics are aligned to the current NCLEX-RN test plan and Next Generation NCLEX (NGN) framework.*

Your Kuala Lumpur NCLEX Exam Pathway

From enrolment in Sri Lanka to examination in Malaysia — step by step

1

Enrol in the NCLEX Preparatory Programme

Contact EDUK8U Grad School Asia to begin your enrolment. Candidates receive access to the LMS, orientation materials, and programme schedule upon confirmation.

2

Complete Online Modules, Tutorials, and Mock Tests

Work through all learning materials, topic videos, clinical reasoning sessions, and mock assessments at your own pace, supported by virtual instructor-led tutorials throughout the programme.

3

Prepare for Official Exam Booking Requirements

Ensure you meet all relevant nursing regulatory body and Pearson VUE eligibility requirements before booking the official NCLEX examination. EDUK8U can provide general guidance on this process.

4

Travel to Kuala Lumpur for the NCLEX Exam

Candidates travel to Malaysia to sit the official NCLEX-RN examination at the Pearson Professional Center in Kuala Lumpur.

5

Progress Toward Your International Nursing Career Goals

After completing the NCLEX exam process, continue your professional registration or employment pathway according to the requirements of the relevant nursing regulator and destination country.

OFFICIAL NCLEX EXAMINATION VENUE

Pearson Professional Centers — Kuala Lumpur

Level 2, Room 2.09 & 2.10, Bangunan AICB, No. 10, Jalan Dato' Onn, 50480 Kuala Lumpur, Malaysia

IMPORTANT NOTICE

The NCLEX examination is an external licensure examination administered through Pearson VUE and the relevant nursing regulatory bodies. Completion of the preparatory programme does not guarantee exam success, registration, employment, or visa approval. Candidates must meet all eligibility, regulatory, registration, and immigration requirements applicable to their chosen destination country.
